

Free condom and lube to enhance pharmacy emergency hormonal contraception (EHC) offer.

Overview

Condoms **prevent unplanned pregnancies and offer effective protection against most STIs** including Chlamydia, Gonorrhoea, and HIV. HCRG Care Group, the commissioned provider of integrated sexual health services across Oldham, Rochdale and Bury, are delighted to announce that we will be supporting pharmacy with **free Condom & lube distribution** to enhance your EHC offer. In addition, we have created a **new referral pathway** to promote service access for those who require emergency IUD contraception, symptomatic STIs, Under 19s and those that would benefit from a regular form of contraception.

If you provide an EHC service user with condoms, this will be recorded via the PharmOutcomes EHC template. **There is no additional paperwork required and we will supply you with pre-packed condoms.**

Types of condoms offered

We will supply a choice of the following condoms for distribution to those accessing EHC.

- Regular
- Non-latex
- Trim
- King size

Each pack will include **6 condoms, water based lubricant and a promo card** which signposts to our sexual health services.

Pharmacies will be provided with condoms on a quarterly basis and will be contacted prior to delivery via email the week before to check if stock is needed and arrange delivery.

Join our webinar to find out more

Find out more about our sexual health services, referral pathways and the condom offer in more detail.

The webinar will be hosted via Microsoft Teams on **3rd October 12pm – 12.30pm**
